CAUTION

Any reproduction of tables found in this document not accompanied by both footnotes and the appropriate section of explanatory notes may result in misinterpretation of information.

Information in this public document was prepared to assist public school administrators in making local comparisons and identifying future needs. The per copy cost for printing and handling was $7. Copies were provided free of charge to selected school district administrators during the initial distribution period.

Other copies may be obtained from a limited supply in Education Information Services, Educational Data Center, (see page vii for address) by sending a check payable to the South Carolina Department of Education for the above listed amount. Data in the tables will be available in DOS ASCII on 5 1/4" or 3 1/2" double-sided low- or high-density diskettes on a prepaid basis for $10, including postage and handling. Reference copies of this publication also are available to the public from county and other public libraries through inter-library loans with the South Carolina State Library located in Columbia, South Carolina.

The South Carolina Department of Education does not discriminate on the basis of race, color, national origin, sex or handicap in admission to, treatment in or employment in its programs and activities. Inquiries regarding the nondiscrimination policies should be made to Personnel Director, 1429 Senate Street, Columbia, SC 29201, (803) 734-8781.

FOREWORD

This document is produced primarily to allow comparisons of school districts on various characteristics which result from or are connected closely with the education process in South Carolina. In some instances, data for characteristics are unavailable for school districts but exist for counties. Therefore, one or the other or both levels of comparisons may be located within various editions of *Rankings*.

For the past twenty-one years, the educational characteristics in this document have been presented in essentially the same format. Each issue was modified to include certain characteristics of increasing interest in the educational community and to exclude certain obsolete characteristics.

The 1992 edition contains 109 ranked characteristics that are arranged alphabetically, by district or county name, and numerically, by characteristic value. **In some instances, a high value may be favorable; in others, it may be unfavorable**. Users should give attention to the sources that are supplied in the Footnote Listing at the end of the tables as well as the Explanatory Notes at the beginning of this document. Additionally, Appendix C should be referenced by users of the tables involving revenues and expenditures.

Care should be taken when comparing the financial data in this report with those of previous years. Several accounting changes were incorporated in the statewide Accounting System during fiscal years 1987-88 and 1988-89.

High, low or median values for the characteristics presented in the tables are not inte[illegible] to measure the quality of education in any school district. Many other factors must be taken [illegible] consideration when determining quality education. This updated information may be useful to you in preparing local profiles, public information brochures, and other such sources of information.

For the past seventeen years, the Department of Education has provided District Profiles based on the school district characteristics found in this document. These profiles will be available again upon request. Additionally, the data in the tables will be available in DOS ASCII on 5 1/4" or 3 1/2" double-sided low- or high- density diskettes.

We continue to desire your comments on uses made of the information within this publication and its importance to you. Your recommendations for change as well as any questions concerning the content of the publication are invited and encouraged.

EXPLANATORY NOTES

The 1992 edition of *Rankings* presents 109 tables of ranked characteristics related to public education in South Carolina. The characteristics are arranged alphabetically by school district or county name and numerically by characteristic value. In some instances, a high value may be favorable; in others, it may be unfavorable.

Statistics for Felton Laboratory School, South Carolina Youth Services District, Palmetto Unified District, and South Carolina School for the Deaf and Blind were excluded from all tables.

State totals presented for tables in this publication may not equal the sum of district/county figures, or may not be exactly the same as listed in the source document, due to rounding procedures.

POPULATION

As the Census Bureau releases the 1990 counts, tables of interest to the education community will be presented in Rankings. This edition includes tables that reflect 1990 population and the percent change in population by county and race. Also, certain tables involving house holds and rural and urban population are included.

ECONOMICS

Census data on poverty and median house hold income by county or school district were not provided by the Census Bureau in time for the 1992 edition.

Tables relating to employment in various categories (Tables 26-32) display estimates of nonagricultural wage and salary employment by the county in which the work was performed, rather than by the county in which the workers resided. This reporting was consistent with the reporting in previous editions. The figures for the State may not equal the sum of county figures in the employment tables due to rounding procedures and the inability to allocate some workers in the South Carolina totals to specific counties.

In order to maintain the confidential nature of data reported by employers, information was not shown in the source document for industries with fewer than three reporting units or when any one firm accounted for 80 percent or more of employment in the industry.

As in the past fifteen editions, the labor force statistics used to calculate unemployment percentages (Table 25) were reported on a residence basis rather than by place of work and were based on an annual benchmark derived from the Current Population Survey Benchmark.

Table 22 gives the 1990 average weekly salary of workers covered in employment. The data reported in the source document were based on employment and payroll information reported by employers to the Unemployment Compensation Division of the South Carolina Employment Security Commission on their regular quarterly tax reports.

PUPILS

The official count for pupils in grades K-12 is the Average Daily Membership (ADM) at the end of the 135-day accounting period. Tables 39-42 present enrollment figures rather than ADM figures to allow certain comparisons.

PROFESSIONAL STAFF

Unless otherwise stated, statistics for personnel in special education schools were included in tables relating to professional staff. County personnel were not included in the various staff tables due to the impracticality of allocating such staff to individual districts. See Appendix D for a definition of staff included in the various tables.

FINANCES

Fringe benefits were excluded from Tables 101-104 but were included in Tables 98 and 99. State funds for fringe benefits were issued directly to the school districts since 1987-88 rather than being held at the State Department of Education as in previous years (except in 1981-82). Consequently, the total fringe benefits were included in the operating funds of the school districts rather than in the operating funds of the State Department of Education as in years prior to 1987-88.

The financial tables include expenditures and revenues for area vocational centers and county boards. The area vocational center monies were prorated among the districts on the basis of the number of pupils attending the centers (See Appendix A). The county board monies were prorated on the basis of ADM for the respective districts (See Appendix B).

The pupil count used in the computation of expenditures and revenues per pupil was the Average Daily Membership for the 135-day reporting period. Kindergarten pupils were counted as half-day pupils.

Table 94 reflects the fiscal capacity as updated annually by the South Carolina Tax Commission. The fiscal capacity shown for each district in this table is determined by the South Carolina Tax Commission and is the sum of five different parts or types of fiscal capacity. Part 1 is the adjusted assessed value of owner-occupied residential property, which is 4% of the full market value. Part 2 is the assessed value of all agricultural property as determined through applying a 4% or 6% assessment ratio according to use. Part 3 is the adjusted assessed value of all the other real property such as commercial property, rental homes, vacation homes, etc., with the assessment rate set at 6% of the full market value. Part 4 is the total assessed value of all the locally assessed personal property such as personal automobiles, boats, airplanes, etc.. Part 5 is the total assessed value of all property which is assessed only by the South Carolina Tax commission. The types of property included in Part 5 are industrial property (real and personal), utility property (power, telephone, railway cars, airlines), merchant furniture, and fixtures, etc..

For Part 1 and Part 3, the South Carolina Tax Commission conducts the Sale Appraisal Ratio Study to obtain the full market value. The Sale Appraisal Ratio Study is based on the true sales information in the two most recent years which is furnished by each county assessor during the applicable years. The sum of these five fiscal capacity parts for any given school district divided by the derived fiscal capacity for the State produces the index of taxpaying ability, commonly referred to as the "ability index," for a given district (See Table 97).

Current operating expenditures reported in this publication (Tables 83, and 98-100) include the totals for Administration, Instructional Services, Plant Operations and Maintenance, Auxiliary Services, and Fringe Benefits. Expenditures for Capital Outlay, Debt Service (Tables 106 and 107), Adult Programs, Community Services, and Pupil Activities are not included in the tables reflecting current operating expenditures. See Appendix C for a complete listing of School District Audit accounts used in the computation of revenues and expenditures.

Caution should be exerted when comparing the financial data in this report with that of *Rankings* prior to the 1989 edition. Among the changes which occurred during fiscal year 1987-88 were the reporting for fringe benefits and the elimination of Adult Programs, Community Services, and Pupil Activities from the revenue computations.

25. Preliminary 1990 data from the South Carolina Employment Security Commission, Research and Analysis, *South Carolina's Labor Force & Industry, 1986 - 1990*, September 1991.

    The labor force data were projected from an annual benchmark derived from the Current Population Survey and represent employment and unemployment by place of residence. These data are not strictly comparable to place-of-work data. Total employment includes agricultural employment and "all other" nonagricultural employment (self-employed, unpaid family, and workers in private households). Detail may not add to totals due to rounding.

26. Ibid.

    All nonagricultural wage and salary employment data are reported by establishment or place-of-work basis. State totals may not equal the sum of county figures due to rounding procedures and the inability to allocate workers in certain industries to specific counties.

Table No.

50. South Carolina Department of Education, Office of School Food Services, reports from school districts for the month of October 1990. School meals may not be made available to all kindergarten students in all districts. Also, students in all grades may be eligible for free or reduced-price meals, but they may choose not to apply or participate in the meal program. Therefore, the number of eligible students shown in this table may not represent total eligible students, and the rate eligible may be slightly distorted.

51. South Carolina Department of Education, Office of Finance, "135-Day Membership and Attendance Report," 1990-91, and *The South Carolina Education Finance Act of 1977*. Kindergarten membership is reported for half-day sessions in South Carolina. The weighting of 1.30 for the classification as presented in the Finance Act was reduced by one-half (0.65) in computing the weighted membership for kindergarten.

52. Ibid. Primary pupils have a weighting of 1.24.

53. Ibid. Elementary pupils have a weighting of 1.00.

54. Ibid. High School pupils have a weighting of 1.25.

55. Ibid.

56. Ibid. Vocational pupils have a weighting of 1.29.

57. Ibid.

58. South Carolina Department of Education, Office of Finance, "Student Accountability System, District Report, Fiscal Year 1990-91" and "District Report, Summer 1991." Academically gifted counts include the number of students served as reported on the 135-day school report and the number of new students served as reported on the summer school report. Counts are low in grades 1 and 2 because programs are not state funded. Counts are low in grades 11 and 12 because academically gifted pupils in grades 11 and 12 generally enroll in advanced placement courses.

59. The College Board, Advanced Placement Program, "Public School AP Distributions: South Carolina, May 1991" (APPC 2850). State totals within this table include 36 candidates and 37 examinations from Sumter District 2. These counts were excluded from the public total in the source document. State Totals within this table exclude 63 candidates and 126 examinations from the Governor's School for Science and Mathematics, and 2 candidates and 2 examinations from Marlboro Academy (private school). These counts were included in the public total in the source document. Number of Advanced placement examinations taken exceeds the number of candidates because some candidates pursue more than one college-level course.

60. South Carolina Department of Education, Office of Finance, "180-Day Enrollment Report, 1990-91," and Office of Regional Services, "District Dropout Summary Reports, 1990-91."

61. South Carolina Department of Education, Educational Data Center, Education Information Services, *Pupils in South Carolina Schools, 1990-91*. Morris Village, and Hall Institute Special are fiscal agents established to accommodate state funding and are excluded from this table.

APPENDIX E

GLOSSARY

Ability Index: A measure of local revenue-producing ability which is based on property values within a school district. It is calculated by dividing the fiscal capacity of the school district by the fiscal capacity of the State. See Fiscal Capacity.

Academically Gifted Students: Those who are identified in grades 1-12 as possessing demonstrated or potential abilities for high performance in academic areas and therefore require services or programs not ordinarily provided by the regular school program.

Administrative Staff: Public school staff located within school districts or schools and involved in duties of managing and organizing local education programs. Administrative positions from the Basic Educational Data System (BEDS) are used to identify this category of staff. Administrative positions, for the purpose of this publication, include school principals; assistant principals; vocational center directors; assistant directors; job placement and adult coordinators; district, county, and area superintendents; and assistant superintendents. This staff count may not exactly correspond to the staff used in the computation of administrative expenditures since two different reporting systems are used. See Expenditures, Administration.

Adult Basic Programs: A combination of class instruction equivalent to that found in grades 1-8 and consisting of basic skill areas such as reading, writing, and mathematics. The program serves adults age 18 and over, unless special permission is granted by a local school board. Class instruction is provided in school districts, churches, housing projects, community centers, health care centers, work places, and other sites.

Adult High School Programs: A combination of class instruction equivalent to that found in grades 9-12. The program serves adults age 18 and over, unless special permission is granted by a local school board. Adults who are literate and can function in everyday life but are not proficient in skill areas may enroll. This includes adults seeking a high school diploma or equivalent completion through the General Educational Development (GED) examination. Classes are offered in school districts, vocational centers, churches, housing projects, community centers, health care centers, work places, and other sites.

Advanced Placement: The Advanced Placement (AP) Program is a cooperative educational endeavor sponsored by the College Board. It serves primarily eleventh and twelfth grade students who wish to pursue college-level studies while still in secondary school.

Assessed Valuation: The value placed upon property for the purpose of taxation. The process of making the official valuation of property is under the auspices of each county assessor and in cooperation with the State Tax Commission. See Explanatory Notes, page vi, for further information.

Auxiliary Services: See Expenditures, Auxiliary Services.

Average Daily Attendance: The aggregate number of days for which students are in attendance divided by the number of days in the reporting period. Average Daily Attendance (ADA) is computed for all public schools and districts at the end of 15, 45, and 135 days of school.

Average Daily Membership: The aggregate number of days for which students are in membership divided by the number of days in the reporting period. Average Daily Membership (ADM) is computed for all public schools and districts at the end of 15, 45, and 135 days of school. The latter count is considered official for funding purposes. See Membership.

Average Salary: The sum of individual salaries divided by the number of individuals. For classroom teachers, only individuals teaching full time within a combination of BEDS position codes 03-09 for a contracted period of at least one hundred ninety days within the school year are included. The salary is the total contracted salary for the school year and does not include bonus or incentive pay as provided under the Education Improvement Act.

Bachelor's Degree: An earned basic degree from an approved college education program which allows an individual to become certified to instruct in one or more subject specialities. Regular teachers must possess a bachelor's degree and meet requirements of certification as adopted by the State Board of Education. A teacher with this basic degree is issued a Class III Certificate. An earned bachelor's degree plus eighteen semester hours of graduate credit in a planned program approved by the State Board of Education entitles an individual to receive a Class II Certificate.

Basic Educational Data System (BEDS): This annual collection is based on individual or self reporting for accreditation purposes.

Capital Investment: See Capital Outlay.

Capital Outlay: A payment or payments associated with the acquisition of land and buildings, the remodeling and construction of buildings and additions to buildings, initial installation or extension of service systems and other built-in equipment, and improvement to sites. It is usually an expenditure which results in the acquisition of or improvement to assets intended to be permanent or fixed. Such a payment is a capital investment or is said to be capital in nature as contrasted with a current expenditure.

County: One of the basic forty-six territorial units of local governments into which the State of South Carolina is divided. These forty-six governmental units encompass ninety-one geographic or territorial public school districts.

Crime Rate: The number of crimes per 10,000 population. The information is collected and classified by the South Carolina State Law Enforcement Division according to the guidelines of the International Association of Chiefs of Police (IACP) and the National Sheriff's Association. Crime includes murder, rape, robbery, aggravated assault, breaking and entering, larceny, motor vehicle theft and arson.

Current Operations: Activities of a school district for a certain school year. The term is normally used to denote monies which are not of a capital nature and are applied during and for the school year under consideration. See Expenditures, Current Operating.

Debt Service: A payment or payments made for the purpose of reducing a debt, excluding current loans, and usually resulting from a capital investment. Such payments are not considered to be associated with the current operations of a school district.

APPENDIX E - Continued

Doctorate Degree: An earned advanced degree which meets requirements for teacher certification as adopted by the State Board of Education. An individual earning this degree is awarded a Class I-Advanced Certificate.

Dropout: A student who leaves school for any reason other than death, prior to graduation or completion of a course of studies and without transferring to another school or institution. For further information see *Policies and Procedures for the Collection of School Dropout Data*.

Education Experience: The total years spent employed in education with appropriate certification for the position or positions held. One hundred forty employed days qualifies an individual for one year of education experience. (Years of experience for retirement purposes is computed differently than that for certification credit. The full one hundred ninety days of employment are necessary to qualify for one year of retirement credit.)

Enrollment: A student count encompassing the number of students present for thirty-five days of school. A student is counted in enrollment on the thirty-fifth day that he(she) has been present in school, provided that he(she) has not been counted in the enrollment of any other school in the State. The enrollment count is cumulative for the school year, i.e., a student remains on the enrollment for the original school of entry for any given school year.

Equalized Revenue: The theoretical amount of funds that a school district would receive if local property taxes other than those designated for debt service were distributed to the school districts in direct proportion to the ability indices of the school districts. The amount is obtained by multiplying the ability index of the school district by the state total of local property taxes for current operations. See Ability Index and Tax Revenue.

Expenditures, Administration: Funds spent for activities concerned with establishing and administering policy in connection with operating schools and the school district. Fringe benefits were excluded from administrative expenditures in the current edition of this publication.

Expenditures, Auxiliary Services: Funds spent for pupil services, instructional staff services, fiscal services, pupil transportation, food services, internal services, and central support services. Fringe benefits were excluded from auxiliary expenditures in the current edition of this publication.

Expenditures, Capital Outlay: See Capital Outlay.

Expenditures, Current Operating: Funds spent for all school district activities excluding capital outlay, debt service, adult programs, community services, and pupil activities. Alternatively, it is the sum of expenditures for administration, instruction, plant operations and maintenance, auxiliary services, and fringe benefits. See Current Operations.

Expenditures, Debt Service: See Debt Service.

Expenditures, Fringe Benefits: Funds spent by the school district for retirement; group life; social security; workers' compensation; unemployment; health, life, and long-term disability; dental insurance; and other local employee benefits.

Expenditures, Instruction: Funds spent for activities dealing with the teaching of pupils or the interaction between teachers and pupils regardless of where activities occur (school classroom, home, hospital, etc.); for approved instructional media such as television, radio, telephone and correspondence; for aides, clerks, teaching machines, etc.. Fringe benefits were excluded from instructional expenditures in the current edition of this publication.

Expenditures, Plant Operations and Maintenance: Funds spent for activities concerned with keeping the physical plant open, comfortable, and safe for use; keeping the grounds, buildings, and equipment safe and in effective working condition and state of repair; and maintaining safety in the vicinity of schools. Fringe benefits were excluded from expenditures for plant operations and maintenance in the current edition of this publication.

Family: A householder and one or more other persons living in the same household who are related to the householder by birth, marriage, or adoption; all persons in a household who are related to the householder are regarded as members of his or her family. See Household.

Federal Revenue: Funds collected by the Federal Government and distributed to school districts either directly or through intervening agencies. Funds designated for capital outlay were excluded from the table ranking revenue per pupil from federal sources in this publication. See Appendix C.

Fiscal Capacity: The assessed value of property located within a school district, adjusted to account for current market value. This measure of school district financial strength is calculated annually by the South Carolina Tax Commission and is the sum of five property tax components. See Explanatory Notes, page vi, for further information.

Fringe Benefits: See Expenditures, Fringe Benefits.

Full-Time Equivalency: The amount of employed time in a less than full-time position expressed in proportion to that required in a full-time position, with "1.0" representing one full-time position. Full-time equivalency is expressed in tenths.

Gifted Students: See Academically Gifted Students.

Household: A household includes all the persons who occupy a housing unit. The occupants may be a single family, one person living alone, two or more families living together, or any other group of related or unrelated persons who share living arrangements. See Family.

Housing Unit: A housing unit is a house; an apartment; group of rooms; or a single room, occupied as separate living quarters, or, if vacant, intended for occupancy. Separate living quarters are those in which the occupants live and eat separately from other persons in the building and have direct access from the outside of the building or through a common hall. The occupants may be a single family, one person living alone, two or more families living together, or any other group of related or unrelated persons who share living arrangements. Both occupied and vacant housing units are included in the housing inventory, except that tents, caves, boats, vans and the like are included only if they are occupied. Vacant mobile homes are included, provided they are intended for occupancy on the site where they stand. Vacant mobile homes on dealer's sales lots, at the factory, or in storage yards are excluded from the housing inventory.

Instruction: See Expenditures, Instruction.

Levy: See Tax Levy.

Local Revenue: Funds received by the school district from local sources including local taxes, tuition, transportation fees, earnings on investments, food sales, rentals, donations, and miscellaneous local sources. Monies received for capital outlay and debt service were not classified in this category. See Local Taxes. See also Appendix C.

Local Taxes: The part of revenue that a school district receives which is a result of local taxation. Included in this category are taxes levied within the school district boundaries such as levies for current operations, levies for debt service, delinquent taxes, levies for permits, licenses and other taxes. Also included are taxes received by the school district from intermediate or other local governmental units. Such taxes include county equalization tax, revenue in lieu of taxes, and money which may not have been earmarked for school purposes. See Tax Revenue. Also see Local Revenue and Appendix C.

Lunch, Free: School lunches provided to public school students without payment of a lunch fee. Student eligibility for free lunch is based on the completion of an application by the parent or guardian and the determination that family size and income as declared on the application meet criteria for free lunch.

Lunch, Reduced-Price: School lunches provided to public school students at a less than full-price fee. Student eligibility for reduced-price lunch is based on the completion of an application by the parent or guardian and the determination that family size and income as declared on the application meet criteria for reduced-price lunch.

Master's Degree: An earned advanced degree which meets requirements for teacher certification as adopted by the State Board of Education. A teacher earning this degree is awarded a Class I Certificate. An earned master's degree plus thirty semester hours of graduate credit in a planned program approved by the State Board of Education entitles a teacher to receive a Class I-Specialist Certificate.

Median Age: The age value in an ordered set of values below and above which are equal numbers of values. The median age listed in the 1990 Census was computed using the age of persons in completed years as of April 1, 1990.

Median Household Income: The amount which divides the household income distribution into two equal groups, one having incomes above the median and the other having incomes below the median. For households, the median income is based on the distribution of the total number of household units including those with no income.

Median School Years Completed: The number of years of school completed by the typical person in the population under consideration. Half the population have less schooling, and half have more schooling.

Membership: The number of pupils present plus the number of pupils absent. The Department of Education collects aggregate days present and absent for all students at the end of 15, 45, and 135 days of school. The aggregate days present and absent divided by the number of days for the appropriate school period equals Average Daily Membership for a given period.

APPENDIX E - Continued

Membership, Weighted: The total obtained by adding the weighted membership for each classification of pupils as specified by the Education Finance Act. The weighted membership for each classification is found by multiplying the Average Daily Membership for the 135-day period by the weighting factor for that classification. The weighting factors are:

	CLASSIFICATION	WEIGHTING FACTOR
(1)	Kindergarten Pupils	1.30
(2)	Primary Pupils (Grades 1-3)	1.24
(3)	Elementary Pupils (Grades 4-8)	1.00
(4)	High School Pupils (Grades 9-12)	1.25
(5A)	Educable Mentally Handicapped Pupils	1.74
(5B)	Learning Disabled Pupils	1.74

	CLASSIFICATION	WEIGHTING FACTOR
(6A)	Trainable Mentally Handicapped Pupils	2.04
(6B)	Emotionally Handicapped Pupils	2.04
(6C)	Orthopedically Handicapped Pupils	2.04
(7A)	Visually Handicapped Pupils	2.57
(7B)	Hearing Handicapped Pupils	2.57
(8)	Speech Handicapped Pupils	1.90
(9)	Homebound Pupils	2.10
(10)	Pre-vocational Pupils	1.20
(11)	Vocational Pupils	1.29

The above weighting factors are used to provide for relative cost differences among programs for different students. Kindergarten pupils are counted as half-day pupils for an effective weighting of .65.

Mills: Units of property taxation. A mill is one tenth of one percent. See Tax Levy.

Net Taxable Sales: Gross sales less allowances for nontaxable items. Businesses currently report sales by the county in which the product was retailed.

Nonpublic (Private) School: A sectarian, ecumenical, or secular school operating within South Carolina and offering, generally for a tuition charge, elementary- and secondary-level instruction to resident or day students of legal school age. Elementary- or secondary-level instruction applies to grades kindergarten through twelve for the purposes of this publication. (Attorney General's Opinion No. 2513, page 200, defines a private school as one established by any agency other than the State or its subdivisions, primarily supported by other than public funds, and operated by officials neither publicly elected nor appointed.)

Nonwhite Count: A sum of persons who report that they belong or identify with Black racial groups of Africa, Hispanic groups, Asian/American (Pacific Islander) origins, or American Indian (Alaskan Native) origins.

APPENDIX E - Continued

Per Capita: Per person.

Per Capita Income: The mean (average) income per person. The figure is calculated by adding the total personal incomes of every man, woman, and child in a particular group and dividing by the number of persons in that group, including those with no income. Persons without income (children, for example) tend to lower the per capita income. See Personal Income.

Per Pupil: Refers to division by the pupil count. The financial tables in this document which refer to revenue, expenditures, assessed valuation, or wealth per pupil use the Average Daily Membership count at the end of 135 days of school. Unless otherwise specified, the unweighted count with all kindergarten pupils counted as half-day pupils is used to rank the school districts according to per pupil values.

Personal Income: The Bureau of Economic Analysis defines Personal Income as the income received by, or on behalf of, all residents of an area from all sources. It is the sum of wage and salary disbursements, other labor income, proprietor's income, rental income of persons, personal dividend income, personal interest income, and transfer of payments, less personal contributions for social insurance. Although most of the income is in monetary form, there are important nonmonetary inclusions --chiefly, estimated net rental value to owner-occupants of their homes, the value of services furnished without payment by financial intermediaries, and the value of food consumed on farms. Not only individuals, but non-profit institutions, private trust funds, and private health and welfare funds, are classed as "persons."

Plant Operations and Maintenance: See Expenditures, Plant Operations and Maintenance.

Poverty Level: A classification based on income of families and unrelated individuals using a poverty index which provides a range of income thresholds varying by size of family, number of children, and age of the family householder or unrelated individual.

Professional Staff: For the purpose of this publication, all persons for which professional staff forms are completed during the annual collection of the Basic Educational Data System (BEDS) constitute professional staff. The types of staff required to complete a staff form are listed in Appendix D.

Public School: An elementary- or secondary-level school operated by publicly elected or appointed school officials in which the program and activities are under the control of these officials and supported by public funds.

Rural Population: The population not classified as urban. See Urban Population.

Salary: The total amount regularly paid or stipulated to be paid to an individual, before deductions, for personal services rendered while on the payroll of a school district. See Average Salary.

School District: The basic administrative unit in the organization of public schools within South Carolina. Currently, 91 geographic public school districts operate under the jurisdiction of local school boards and through the school district superintendent or chief administrator.

APPENDIX E - Continued

Six-Year Certificate: An earned master's degree plus thirty semester hours of graduate credit in a planned program approved by the State Board of Education. A teacher earning this certificate is awarded a Class I-Specialist Certificate. An applicant must possess a minimum of sixty graduate semester hours and must meet requirements for an initial area of certification as adopted by the State Board of Education.

State Revenue: Funds collected by the State and distributed to school districts. Funds that are dispersed directly by the State, such as those for operating the school bus system are not included as revenue at the school district level. The portion of fringe benefits paid by the State were included in the revenue of the school districts only for school years 1981-82 and 1987-88 through 1990-91. Such fringe benefits were included in the budget of the State Department of Education for all other years that fringe benefits were partially or wholly funded by the state. Funds designated for capital outlay were excluded from the table ranking revenue per pupil from state sources in this publication. See Appendix C.

Supervisory Staff: For the purpose of this publication, persons occupying the professional positions of director, supervisor, consultant, and coordinator of special instructional areas and located within the county or school district office constitute supervisory staff. The specific position types are listed in Appendix D, "County/District Office Personnel Only."

Tax Base: The value to which the tax rate is applied to determine the tax due. For property tax, the base is the assessed valuation; for income tax, the base is the taxable income.

Tax Effort: The ratio calculated by dividing tax revenue by equalized revenue for a school district. See Tax Revenue and Equalized Revenue.

Tax Levy: The tax rate; the ratio of tax to the tax base. For property tax, the rate is in mills and is applied to the assessed valuation to determine the tax. See Mills.

Tax Revenue: Funds received by a school district through taxation of local property. Tables in this document distinguish between taxes received for current operations and taxes received for debt service. See Local Taxes. See also Appendix C.

Taxable Income: The aggregate amount of income on which South Carolina personal income tax liability is based. For an individual, it is the figure on which income tax is determined by applying the tax rates or by using the tax tables.

Teacher Turnover: The ratio of teacher attrition to the base-year teacher count expressed as a percent. Only full-time teachers who possessed valid credentials and were employed more than one hundred forty days during a school year were counted for the year. The teacher turnover rate is the smaller of the percent of prior-year teachers who terminated and the percent of current-year teachers who were newly-employed. Use of the smaller percentage largely compensates for effects due to expansion or contraction of programs and/or the student population base within a school district.

Urban Population: All persons residing in areas determined to be urbanized areas or in places of 2,500 or more outside urbanized areas. See Urbanized Areas.

APPENDIX E - Continued

Urbanized Areas: These areas are defined by population density, and are composed of an incorporated place and surrounding densely settled areas that, together, have a combined population of at least 50,000. There is no minimum size for the incorporated place that forms the central city of the area. The boundaries of urbanized areas do not generally conform to county boundaries. See Urban Population.

Wealth Per Pupil: The fiscal capacity of a school district divided by the membership. See Fiscal Capacity and Per Pupil.

White Count: A sum of persons who report that they belong or identify with people having origins from any of the original people of Europe, North Africa, or the Middle East.
